PLATFORM CONTROLS OWNED ACROSS 6+ DOMAINS	TEAMS ALIGNED ON OMNICHANNEL RE-KYC	ENGAGEMENT FROM AI-NATIVE PLATFORM LAUNCH	EFFORT CUT VIA AUTOMATED INTEGRATIONS

PROFESSIONAL EXPERIENCE

ICICI Bank
Jun 2025 – Present

Product Manager – Cards & Payments Platform · Mumbai

- Own the roadmap and delivery for a 470+ control framework spanning 6+ regulatory domains on the cards and payments platform: prioritise by risk, translate requirements into functional specs and user stories, and drive engineering to build.
- Shipped a customer-facing transaction-limit feature on the flagship app, giving customers real-time spend control across payment channels and reducing fraud exposure.
- Leading a risk-based, omnichannel Re-KYC rollout across app, web and branch, aligning 8+ engineering, risk, ops and design teams on one integration plan while minimising customer friction.
- Identified and resolved a cross-system identity-resolution defect across 20k+ IDs, and cleared a 2+ year backlog on cards linked to closed accounts via a new segmentation model, preventing multi-crore exposure.
- Automated multi-lakh-row regulatory reporting integrations (AIR/SFT, PIDF), cutting an 11-person, 6-week effort ~70%; recognised in writing by senior leadership.

Diginique Techlabs
Aug 2022 – Aug 2024

Lead, Product & Growth Strategy · Delhi

- Launched an AI-native, hyper-personalised learning platform that tripled engagement; owned discovery, technical design and iteration end-to-end.
- Integrated OpenAI APIs into a real-time adaptive assessment platform, translating API documentation into user stories for engineering and saving 100+ manual hours weekly.
- Drove 80% YoY revenue growth and launched the company's first recurring-revenue (annuity) model; presented strategy and results directly to the founders and leadership.

BundleOjoy
Dec 2024 – May 2025

Growth Lead, Founder's Office (Juno Mom & Loopie) · Gurugram

- Doubled Juno Mom's revenue in ~5 months by redesigning pricing (+~35% margins) and owning 20+ external partner and affiliate relationships end-to-end.
- Built and tracked SKU-level P&L and live KPI dashboards that steered pricing and spend decisions across two brands.

Udaan
Aug 2020 – Nov 2020

Business Development – Graduate Trainee · Bengaluru

- Cut Return-to-Origin from 15% to 7% across the Lifestyle category using a dynamic revenue-impact model to prioritise interventions and delist 22+ high-RTO brands.

PLATFORM PROJECTS

Appetizer App, IIT Roorkee · food-service platform
Built and launched a campus dining platform for 8,000+ users across 10 messes: integrated biometric entry hardware with the ordering system, automated a ledger routing ₹27L+ in rebates, and used opt-out data to shrink forecasting windows to 4 hours, cutting food waste 30%. Won the national "Eat Right Campus" award.

PROFILE

Technical PM who turns API specs, hardware integrations and regulatory requirements into shipped platform features. Owns a 470+ control framework on a bank's cards and payments stack, integrated OpenAI APIs into a live assessment platform, and built a biometric, ledger-backed food-service platform for 8,000+ users. Daily user of AI tools.

KEY COMPETENCIES

Platform & Integrations
API specs → user stories · System integration patterns · Hardware–software sync (biometrics) · Payments & ledger reconciliation · Partner management

Product Leadership
Multi-year roadmaps · PRD / BRD · Agile (Scrum, JIRA) · Executive presentations · Cross-functional alignment (8+ teams)

Data & AI
AI / LLM tools (OpenAI APIs) · KPI definition & tracking · SQL / MySQL · Power BI · A/B testing · P&L modelling

EDUCATION

Indian Institute of Technology (IIT) Roorkee
B.Tech, Civil Engineering · 2016 – 2020

LEADERSHIP & BEYOND

Mentoring & people leadership
Deputy General Secretary, Students' Affairs Council and President, Civil Engineering Consortium at IIT Roorkee; co-founded Atharv Foundation (NGO serving 500+ families) and led its volunteer team.

UPSC Civil Services (2021–23)
Cleared Prelims on the first attempt; among ~12,000 selected from 1M+ applicants.
